

Fund Assure

Investment Report, August 2015

IN THIS POLICY, THE INVESTMENT RISK IN INVESTMENT PORTFOLIO IS BORNE BY THE POLICYHOLDER.

Dear Friends,

The month of August 2015 saw the benchmark index BSE Sensex and CNX Nifty shed 6.51% and 6.58% respectively. The Mid-cap index, CNX Mid-cap shed 4.88% during the same period.

On the global front, the US GDP growth for the second quarter was revised upward from an initial estimate of 2.3% to 3.7% with consumption accounting for the bulk of growth, followed by investment and government spending. The minutes of the meeting of the US Federal Reserve (Fed) revealed that “almost all” members needing to see more evidence before they would feel “reasonably confident” that inflation would return to the committee’s longer-run objective over the medium term. This comment makes the looming rate hike from the Fed in September less certain.

The month of August saw a policy-led devaluation of the Chinese currency, the largest in over a decade, which caused some disruption across the emerging market currency space as the People’s Bank of China (PBoC) shifted to a new regime of determining the exchange rate against the USD in line with the daily market moves. The PBoC also reduced its benchmark 1year lending rate and deposit rate by 25bps, to 4.60% and 1.75% respectively, the fifth rate cut since November 2014 to provide monetary policy stimulus to the slowing Chinese economy.

India’s manufacturing PMI softened a tad to 52.3 in August from 52.7 in July, as output and new order flows moderated. Meanwhile, both input and output prices ticked down in August, indicating lower inflationary pressures.

Indian GDP growth for the first quarter FY 2016 slowed to 7% year on year as against market expectation of 7.4% and the 7.5% registered in fourth quarter FY 2015, even as the gross value added (GVA) expanded at 7.1% on expected lines, up from 6.1% in the prior quarter. The services growth was robust at a healthy 8.9% year on year even as agriculture growth remained muted at 1.9%, while manufacturing sector notched up a healthy 7.2% growth on a year on year basis. The sources of disappointment were the anemic growth in electricity at just 3.2% versus 10.1% a year ago and the muted increase in spends pertaining to community, social and personal services which grew by just 2.7%. Overall, the GDP and GVA prints point to a gradual economic recovery.

Fiscal deficit reached 69% of the government’s budget estimate (BE) during April–July 2015 as against 61% in the same period last fiscal. The government’s expenditure grew 19% year on year during April–July 2015, well above the BE of 8% for the full year, led by capital expenditure growth of 39% year on year much above the BE of 29% for the full year while the revenue expenditure grew 16.5% much higher than the BE of 5% for the full year. The government’s gross tax collections grew 18% year on year during April–July 2015, above the BE of 16% for the full year, led by higher excise and customs duty collections even as both income tax and corporate tax collections remained muted.

Cumulative rainfall till August 28th has been 12% below Long Period Average (LPA) with 21 out of the 36 subdivisions receiving normal or excess rainfall. Water levels as on August 27th stood at 58% of the total reservoir capacity, 13% lower when compared with last year and 12% lower than the 10-year average. However, Kharif (summer crop) sowing as of August 28th is 1.1% higher than that of the same period last year, with the acreage under pulses increasing by 12%, sugarcane by 3.5%, coarse cereals by 3.2% and oilseeds by 1.4% year on year. While Rice sowing was at similar levels as compared to last year, cotton acreage was 7% lower than last year.

The monthly trade deficit widened to USD 12.8bn in July compared to USD 10.8bn registered in the prior month. Goods exports continued to decline by 10.3% year on year in July led by petroleum products. Goods imports also declined by 10.3% year on year in July but crude oil imports though declining by 35% year on year picked up sequentially to USD 9.5bn in July as against USD 8.7bn in the prior month even as gold imports rebounded to USD 3bn in July on festive season demand.

The Consumer Price Index (CPI) inflation for July 2015 came in at 3.8%, lower than the market expectation of 4.4% as well as the 5.4% registered in the month of June. The WPI inflation for June came in at a negative 4.1% year on year, lower than market expectations, registering ninth straight month of negative WPI inflation print. The CPI and WPI inflation prints for the month of July continue to confirm the presence of disinflationary forces in the economy.

We believe that the equity market offers an attractive entry point for a long-term investor with a 3-5 year view

Market Outlook - Debt

Fund Assure, Investment Report, August 2015

Debt market in the month of August 2015 saw the new benchmark 10 year Government security (G-sec) close the month at 7.79% levels, easing by 2 bps over the month. On the corporate bond side, the 10 year AAA corporate bond closed the month at around 8.35% levels, easing by 9 bps over the month.

The foreign portfolio investors (FPIs) have been marginal sellers in the Indian debt to the tune of USD 0.12 bn in August. However, the FPIs have bought Indian debt to the tune of USD 6.2bn in the first eight months of the calendar year 2015.

The RBI, in its annual report indicated that the risks to inflation were balanced and that it would strive to bring down inflation as per the proposed glide path targeting 5% by January 2017. RBI also cautioned that there could be uncertainties to global capital flows as the US Fed begins to normalize interest rates. The RBI wanted to focus on a speedy resolution of distressed assets in order to enable healthier bank balance sheets. RBI announced the transfer of surplus to the tune of ₹659 bn to the government as compared to ₹527 bn prior year, almost ₹90bn higher than the anticipated amount as per Union Budget, which could be channelized for recapitalization of PSU banks.

The summary of the technical advisory committee of the RBI revealed that the majority of members had advocated a reduction in the repo rate in the third bi-monthly monetary policy review on August 4th. Four of the seven members recommended a reduction in the policy repo rate, with three among them suggesting a reduction of 25 bps as they felt that inflation was in line with the RBI's projected glide path. The member who suggested a reduction in policy repo rate by 50 bps was of the opinion that the real economy

continued to be very weak even as inflation risks receded and the fiscal and current account deficits were under control.

The July CPI and WPI inflation print were significantly below market consensus even after adjusting for the favorable base effects for this period. The disinflationary forces seem entrenched in the economy due to lower producers' input prices helped by falling global commodity prices and the excess capacity in the economy. The March 2016 CPI inflation print is expected to comfortably undershoot the RBI's projections due to the prudent food price management policies of the government along with secondary effects of the down tick in commodity prices.

In the near term, the RBI would want to monitor the outturn of the rainfall and the recent hardening of prices of select food items and will seek evidence of a further fall in food prices in the August CPI inflation print. If such evidence is forthcoming, the RBI could lower the repo rate in its monetary policy on September 29th and reduce its inflation estimate for the end fiscal FY 2016. The recent depreciation of the yuan, the benign international crude oil prices as well as the satisfactory sowing pattern of the Kharif (summer) crop despite a subpar monsoon are additional factors which could nudge this decision favourably. Any delay in the hike in interest rates by the US Federal Reserve (Fed) in its September meeting would add further space for the RBI to move decisively on the repo rate in its monetary policy review.

The fixed income markets would track the progress of the monsoon, the August CPI inflation print, the FOMC meeting of the Fed as well as the RBI's bi-monthly monetary policy for further cues.

Market Outlook - Equity

Fund Assure, Investment Report, August 2015

The month of August 2015 saw the benchmark index BSE Sensex and CNX Nifty shed 6.51% and 6.58% respectively. The Mid-cap index, CNX Mid-cap shed 4.88% during the same period.

The FIIs were net sellers with outflows of around USD 2.6 bn in the month of August 2015 and the DIIs were net buyers to the tune of USD 2.4 bn with insurance companies net buyers to the tune of around USD 0.9 bn and domestic mutual funds, net buyers to the tune of USD 1.5 bn. FIIs have bought Indian equities to the tune of USD 4.3 bn in the first eight months of the calendar year even as the DIIs have been net buyers of around USD 6.8 bn in the same period, with insurance companies selling around USD 0.5 bn even as domestic mutual funds bought around USD 7.3 bn.

The month of August saw the Indian equity markets weighed down by global uncertainties due to yuan devaluation, sell-off in commodities and domestic factors such as a sub-par monsoon and political stalemate resulting in an unproductive monsoon session of Parliament.

Profit growth for Sensex companies in the first quarter FY 2016 was at 1.8% year on year even as EBITDA margins surprised positively and expanded 120bps on a year on year basis. The companies linked to export sector fared relatively better while those in the commodity sector were impacted by the correction in global commodity prices.

The finance ministry formally accepted the recommendations of the committee on Minimum Alternate Tax (MAT), headed by the law commission chairman A P Shah, exempting foreign institutional investors (FIIs) and foreign portfolio investors (FPIs) from MAT on transactions prior to April 1st, 2015. The income tax department had raised a demand amounting to over ₹6bn earlier and the tax department now is expected to issue a circular to field offices to hold off action on notices issued for levy of MAT on FIIs and FPIs.

The government spending has picked up sharply in the road sector in the April-July 2015 period, with the government already spending 63% of the full year road budget. In addition to the road sector, the government increased the plan expenditure meaningfully in the first four months of fiscal FY 2016 in railways,

urban development, power, drinking water & sanitation and atomic energy. Going forward, the capex in the railway sector could see a robust up tick as 400 stations are expected to be awarded for redevelopment on a public private partnership mode, two locomotive factories would be finalized and remaining tenders for dedicated freight corridor could be awarded by end FY 2016.

In an effort to streamline the functioning of the PSU banks, the government announced a seven point agenda which focused on speedy appointments, creation of bank board bureau, adequate capitalization, de-stressing banks and strengthening risk control measures as well as robust NPA disclosures, empowerment, framework for accountability and governance reforms. The key measures are capital allocation of ₹200 bn to be made within a month to 13 PSBs and a new framework of key performance indicators to be measured for evaluating the performance of PSBs.

The RBI has granted an “in-principle” approval to 11 applicants to set up payment banks which included telecom companies, fin-tech companies, NBFCs and public sector entities. The payment banks are expected to primarily focus on small savings and payment services to rural and low-income urban households and catalyze the shift of India’s cash economy to formal financial systems.

The government has approved the spectrum sharing norms recommended by TRAI allowing operators and licensees to share spectrum as long as the operators have spectrum in that specific band. The policy to allow spectrum sharing is expected to facilitate improvement in spectral efficiency and result in better spectrum utilization.

Going forward, while global uncertainties will continue to shape the trajectory of the Indian equity markets, the markets would take further cues from the comments of the US Fed in its upcoming FOMC meet, RBI’s policy stance in its bi-monthly monetary policy review as well as the continued reform agenda of the government.

We believe that the equity market offers an attractive entry point for a long-term investor with a 3-5 year view
