

Fund Assure

Investment Report, July 2015

IN THIS POLICY, THE INVESTMENT RISK IN INVESTMENT PORTFOLIO IS BORNE BY THE POLICYHOLDER.

Dear Friends,

The month of July 2015 saw the benchmark index BSE Sensex and CNX Nifty gain 1.2% and 2% respectively. The Mid-cap index, CNX Mid-cap surged 5.5% during the same period.

On the global front, the US Federal Reserve suggested continued progress towards the imminent liftoff in the US interest rates as they expect “some further improvement” before hiking rates later this year. The second quarter US GDP growth came in at 2.3%, marginally below market expectations of 2.5%. On the positive side, the contraction in the first quarter GDP was erased as the GDP print for the first quarter was revised up to 0.6% from a negative 0.2% estimated earlier.

HSBC’s India manufacturing PMI rose to 52.7 in July as against 51.3 in the prior month as the output and new order flows strengthened. Meanwhile, input prices inched up after a sharp decline registered in the prior month, while output prices remained unchanged.

The countrywide data released by the India Meteorological Department (IMD) indicated that the cumulative rainfall was 4% below normal up to July 30th. Close to 70% of Kharif (summer crop) sowing had been completed through end-July, a growth of 9% over the same period last year, largely led by oil seeds, coarse cereals, pulses and rice. The total live storage in 91 key reservoirs stood at 45% of the storage capacity as of July 30th, 2 % above last year’s storage and 8 % above the last ten year average.

In its third Bi-monthly monetary policy, RBI kept the policy repo rate on hold at 7.25% along expected lines but lowered the inflation projections for January-March 2016 by about 20 bps while maintaining the GDP growth estimate for fiscal FY 2016 at 7.6%.

The monthly fiscal deficit numbers for the first quarter FY16 suggested that the overall deficit reached 52% of the FY16 target for the full year, albeit lower than 56.1% in the same period previous year. Gross taxes rose by a healthy 17.5% year on year in the first quarter driven by the buoyancy in indirect taxes on the back of sharp hike in the excise duty of petrol and diesel, while direct taxes registered a muted growth. Expenditure rose by 4.2% year on year as against the budgeted 5.7%, with the government channelizing most of the savings in fuel subsidy into the infrastructure sectors such as roads and highways, railways, urban development and power.

Trade deficit in June remained in a tight range, widening marginally to USD 10.8 bn from USD 10.4 bn in the prior month. Exports continued to contract by a negative 15.8% year on year in June even as it remained almost flat sequentially at USD 22.3 bn while imports contracted by a negative 13.4% year on year to USD 33.1 bn in June. Sluggish export momentum continued to reflect persistence of weak global demand while muted core import growth reflect muted domestic demand, although there are some nascent signs of pick-up, primarily in capital goods imports.

The Consumer Price Index (CPI) inflation for June 2015 came in at 5.4%, higher than the market expectation of 5.1% as well as the 5% registered in the month of May. In contrast to the elevated CPI inflation, the WPI inflation for June came in at a negative 2.4% year on year, in line with market expectation and similar to the prior month. This was the eighth straight month of negative WPI inflation print.

The CPI and WPI inflation prints for the month of June broadly confirm the continued presence of disinflationary forces in the economy. Government has taken several steps to contain food inflation in the recent months by easing bottlenecks on the supply side in key food components such as pulses and edible oils besides off-loading rice and wheat into the open market from the central pool stock over and above the buffer norm.

We believe that the equity markets continue to offer the comfort of reasonable valuations for a long-term investor with a 3-5 year view.

Team Investment

Market Outlook - Debt

Fund Assure, Investment Report, July 2015

Debt market in the month of July 2015 saw the new benchmark 10 year Government security (G-sec) close the month at 7.81% levels, easing by 5 bps. On the corporate bond side, the 10 year AAA corporate bonds closed the month at around 8.45% levels, easing by 12bps over the month.

The foreign portfolio investors (FPIs) have been marginal sellers in the Indian debt to the tune of USD 0.09 bn in July. However, the FPIs have bought Indian debt of USD 6.3 bn in the first seven months of the calendar year 2015.

In its third Bi-monthly monetary policy, RBI kept the policy repo rate on hold at 7.25% along expected lines but lowered the inflation projections for January-March 2016 by about 20 bps while maintaining the GDP growth estimate for fiscal FY 2016 at 7.6%.

The RBI opined that the near normal rainfall and higher reservoir levels auger well for the prospects of kharif output, particularly for areas that are dependent on irrigation and if prospects of a good harvest strengthen, weak rural demand would improve to provide an important boost to activity. However, the RBI was concerned with the Indian exports situation as a result of weak global demand and global overcapacity as well as due to the significant depreciation of currencies of some major trading partners against the Indian rupee. The Reserve Bank's survey-based indicators pointed to flat capacity utilization and new orders along with declining growth in corporate sales. However, there were signs that the urban consumption demand was picking up.

The RBI was concerned that the headline consumer price index (CPI) inflation rose for the second successive month in June 2015 to a nine-month high on the back of a broad based increase in price pressures in all sub-groups barring housing. The RBI stated that the near-term inflation expectations of households returned to double digits after two quarters, although those of professional forecasters remained anchored. The RBI guided that they would look through large base effects which are expected to pull down headline inflation in July and August.

The RBI noted that since the first rate cut in January, the median base lending rates of banks had fallen by around 30 bps, a fraction of the 75 bps in rate cut thus far. They expected more transmission as loan demand picks up in the third quarter of fiscal 2015-16 and as banks see more gains from cutting rates to secure new lending.

The RBI focused on the key inflation drivers such as the full effects of the service tax increase and sharp price increase in protein-rich items such as pulses in recent months. However, the RBI also alluded to mitigating factors which enable the easing of price pressures such as the sharp fall in crude prices since June, increase in sowing of pulses and oilseeds; the success of the government's pro-active supply management to contain shocks to food prices, especially of vegetables, alongside its decision to keep increases in minimum support prices moderate. This implies that inflation projections for January-March 2016 were revised lower by about 20 bps, with risks broadly balanced around the target of 6% for January 2016.

The RBI felt it prudent to keep the policy rate unchanged at the current juncture while maintaining the accommodative stance of monetary policy. The RBI believed that significant uncertainty would be resolved in the coming months, including the likely persistence of recent inflationary pressures, the full monsoon outturn, as well as possible actions of the US Federal Reserve. The RBI summarized that it awaited greater transmission of its front-loaded past actions even as it would monitor developments for emerging room for more accommodation.

The fixed income market would continue to take further cues from the progress of monsoons, the trajectory of the global oil prices as well as the news flow from the US Federal reserve regarding the imminent interest rate hike later this year. The market watchers would see some space for the repo rate to nudge lower in subsequent monetary policy of the RBI if favourable developments are forthcoming in these key areas.

Market Outlook - Equity

Fund Assure, Investment Report, July 2015

The month of July 2015 saw the benchmark index BSE Sensex and CNX Nifty gain 1.2% and 2% respectively. The Mid-cap index, CNX Mid-cap surged 5.5% during the same period.

The FIIs were net buyers with inflows of around USD 0.87 bn in the month of July 2015 and the DIIs were net sellers to the tune of USD 0.04 bn with insurance companies net sellers to the tune of USD 0.72 bn and domestic mutual funds, net buyers to the tune of USD 0.68 bn. FIIs have bought Indian equities to the tune of USD 6.9 bn in the first seven months of the calendar year even as the DIIs have been net buyers of around USD 4.2 bn in the same period, with insurance companies selling around USD 1.4 bn even as domestic mutual funds bought around USD 5.6 bn.

The Indian equity markets in the month of July was impacted by global uncertainties due to the Greece debt issues, the volatility in the Chinese capital markets as well as the prospect of the imminent hike in the interest rates from the US Federal Reserve. However, the equity market seems to have taken these developments in its stride and has shown resilience by trending up.

The first quarter FY 2016 financial results thus far, have been a mixed bag with no meaningful improvement in key metrics such as NPLs for banks, volumes of cement companies and order inflows for industrial companies. That said, the profit growth of many companies was supported by stronger operational performance in a slew of sectors such as automobile, paints and FMCG on the back of benign raw material prices. Moreover, a combination of low urban CPI inflation as well as low interest rates is expected to shore up revenues and profits of urban consumption centric sectors in the medium term. However, the cyclical sectors which are linked to investment cycle and global commodity companies have reported lower than estimated earnings.

The government has laid out a roadmap for infusing ₹700 bn in PSU banks over the next four years: ₹250 bn in the current fiscal year, ₹250 bn in FY17 and ₹100 bn in both FY18 and

FY19. Of the proposed capital infusion, about 40% will be given to those banks that require support to maintain regulatory capital requirement, 40% to the top six PSU banks and the remaining 20% based on the PSU bank performance against a pre-defined set of deliverables.

The cabinet has sought to simplify India's investment regime and give companies greater leeway in choosing how they plan to raise capital by clubbing Foreign Direct investment and Portfolio investment together with investments by non-resident Indians under a composite sectoral cap.

The Cabinet approved setting up of the ₹200bn National Investment and Infrastructure Fund (NIIF), as announced in the 2015-16 Budget with the corpus of NIIF used to raise debt and, in turn, be invested as equity in infrastructure finance companies. The Government contribution would not exceed 49% of the subscribed capital of NIIF, so that it could be seen as a sovereign fund and take independent decisions on its planned investments.

The economic activity has picked up in key sectors such as roads and power generation. The pick-up in heavy commercial vehicle sales and rising port and domestic air freight in first quarter suggest strengthening transportation activity. The retail loan growth has remained robust with the increased consumer confidence reflecting the economy's improved outlook. Nominal bank credit growth, though lower than previous years, if adjusted for lower inflation, lower borrowing by oil marketing companies and increased borrowing from commercial paper markets seems to indicate adequate availability of credit for most sectors. All these factors point to a recovery and will act as tailwinds for corporate earnings in the coming quarters.

We believe that the equity markets continue to offer comfort of reasonable valuations for a long-term investor with a 3-5 year view

Disclaimer

1. The fund is managed by Tata AIA Life Insurance Company Ltd. (hereinafter the "Company").
2. Past performance is not indicative of future performance. Returns are calculated on an absolute basis for a period of less than (or equal to) a year, with reinvestment of dividends (if any).
3. All investments made by the Company are subject to market risks. The Company does not guarantee any assured returns. The investment income and price may go down as well as up depending on several factors influencing the market.
4. Every effort is made to ensure that all information contained in this publication is accurate at the date of publication, but no responsibility or liability in respect of any error or omission is accepted by the Company.
5. Please know the associated risks and the applicable charges, from your Insurance agent or the Intermediary or policy document issued by the insurance company.
6. Various funds offered are the names of funds and do not, in any way, indicate the quality of the funds, their future prospects & returns.
7. Premium paid in ULIPs are subject to Investment risks associated with capital markets & the NAV of the units may go up or down based on the performance of the fund and factors influencing capital markets & the insured is responsible for his/her decision.
8. Whilst every care has been taken in the preparation of this document, it is subject to correction and markets may not perform in a similar fashion based on factors influencing the capital and debt markets; hence this review note does not individually confer any legal rights or duties.
9. Unit Linked Life Insurance products are different from traditional insurance products and are subject to risk factors.
10. Tata AIA Life Insurance Company Limited is only the name of the Insurance Company & any contract bearing the prefix 'Tata AIA Life' is only the name of the Unit Linked Life Insurance contract and does not in any way indicate the quality of the contract, its future prospects or returns.
11. Insurance is the subject matter of the solicitation.
