

Fund Assure

Investment Report, June 2016

Dear Friends,

The month of June 2016 saw the benchmark index S&P BSE Sensex gain 1.24% while Nifty 50 gained 1.56%. The Mid-cap index, Nifty Free Float Mid-cap 100 surged 3.94% during the same period.

On the global front, Britain voted to leave the European Union (EU) in a close referendum, triggering a global risk off sentiment. Once the initial knee jerk reaction subsided, market experts came around to the considered view that the EU could probably take Brexit in its stride and survive unless it led to a contagion of other Euro-member exits. Now Britain will need to renegotiate all trade agreements with EU in what could be a long drawn process over many months. A leave date of two years post Britain invoking Article 50 of the Lisbon treaty seems the most likely scenario.

The June FOMC meeting of the US Federal Reserve (Fed) signalled a dovish stance even though the Fed chairperson de-emphasized the significance of any single monthly report in a reference to the anaemic employment report for the month of May. In its FOMC meeting, the Fed acknowledged the rise in uncertainty around jobs data and potential risk from a Brexit scenario. Britain's vote to leave the EU is likely to keep the Fed on an extended pause pushing back its initial plans to continue hiking interest rates over the next few months.

On the domestic front, the Indian government raised foreign investment caps in key sectors, brought more investments under the automatic route and relaxed some conditions governing FDI to improve the ease of doing business. Additionally, the local sourcing norm for single brand sector has been relaxed in 'state of the art' and 'cutting edge' technologies.

The fiscal deficit in the first two months of fiscal 2017 was at 43% of the FY2017 budget estimate with gross tax collections growing 38.3%, higher than the 11.9% growth budgeted in FY2017 with robust growth in indirect tax collections at 40.8% and direct tax collections at 33.9%. Total expenditure increased 13.4% with non-plan expenditure increasing 3.4% and plan expenditure growth of 45.8% as the government seems intent on front-loading plan expenditure with a particular emphasis on rural and urban development.

The Union cabinet accepted the recommendations of 7th central pay commission with regards to pay and pensions for around 10mn central government workers and pensioners even as it deferred the recommendation on allowances to a committee headed by the finance secretary for further examination. The total fiscal impact of the full pay commission was projected earlier at ₹1.02 tn annually which now stands at around ₹850 bn after excluding the expenditure on allowances but including the arrears, to be shared between central government at ₹606bn and railways at ₹243bn. It is expected that wage revisions will help boost private consumption especially in urban areas thus supporting overall growth with help from lower cost of capital through improved monetary transmission.

The south west monsoon has seen a strong pick up in recent weeks as cumulative rainfall till June 29th was just 11% below normal. Out of the 36 subdivisions across India, 8 have received excess rainfall, 17 have received normal rainfall, 9 have received deficient rainfall, and 2 have received scanty rainfall thus far. The sowing of Kharif (summer crop) as of July 1, 2016 was 22.7% lower than the same period last year with shortfall in oilseeds, pulses, coarse cereals and cotton.

India's Current Account Deficit for Q4 FY 2016 printed a moderate USD 0.3 bn, much lower than the USD 7.1 bn seen in the prior quarter due to low oil prices and muted gold imports. For FY2016, CAD stood at a manageable 1.1% of GDP and BoP surplus stood at USD 17.9 bn in FY2016.

India's trade deficit for the month of May printed a comfortable USD 6.3 bn, albeit higher than USD 4.8 bn in April. Exports in May contracted by 0.8% yoy as against a more severe contraction of 6.7% in April to USD22.2 bn while imports contracted by 13.2% yoy to USD28.4 bn in May against a more severe contraction of 23.1% in April.

The Consumer Price Index (CPI) inflation for May 2016 came in at 5.8%, higher than the market expectation of around 5.6% as well as higher than the 5.5% registered in the month of April. Wholesale Price Index (WPI) inflation for May 2016 was at 0.8% as against 0.3% in the prior month. CPI and WPI inflation prints for the month of May 2016, though on a higher trajectory, continue to confirm the presence of disinflationary forces in the economy.

Given the improving macro economic backdrop, we believe that the equity market offers an attractive entry point for a long-term investor with a 3-5 year view.

Team Investment

Equity Market Outlook

The month of June 2016 saw the benchmark index S&P BSE Sensex gain 1.24% while Nifty 50 gained 1.56%. The Mid-cap index, Nifty Free Float Mid-cap 100 surged 3.94% during the same period.

The FIIIs were net buyers with inflows of around USD 0.72 bn in the month of June 2016 and the DIIIs were net sellers to the tune of USD 0.32 bn with insurance companies' net sellers to the tune of around USD 0.36 bn even as domestic mutual funds were net buyers to the tune of USD 0.04 bn.

In the month of June, the Indian equity market took the key global event, 'Brexit' in its stride and scaled higher levels on the back of domestic triggers such as 7th pay commission, a pickup in monsoons after a slow start and a slew of reforms announced by the government. Going forward, the markets will react to the Q1 FY 2017 earnings season, legislative activity in the monsoon session of parliament around the possible passage of the key GST Bill, the announcement of the new RBI governor as well as further progress of the monsoons in the crucial sowing months of July and August.

In an effort to open up the Indian aviation sector, the government announced the National Civil Aviation Policy, where it eased the norms for domestic carriers to fly international routes. The policy outlined guidelines to make flying more affordable by capping airfares and increase regional connectivity by creating a 'viability funding mechanism' to support airlines on unviable routes.

The Union Cabinet has approved the Bill to allow malls, local markets, restaurants and movie theatres, not covered under the Factories Act 1948 with more than 10 employees, to remain open for 24 hrs and 7 days a week. Once the Bill is passed, the retail industry expects higher footfalls, open new avenues of growth, and a level-playing field with e-commerce players in addition to generating jobs and increasing consumer convenience.

The Union Cabinet approved a special package for the textile and apparels sectors with the aim of generating 10 mn jobs in these sectors over the next three years. The package includes various measures which are labour friendly, promote employment generation, economies of scale and boost exports. In a bid to attract private sector investment into exploration of non-fuel and non-coal minerals, the Union Cabinet approved the National Mineral Exploration Policy (NMEP) which allows acreages to be auctioned to private companies for mining on a revenue-sharing model.

The RBI released the Financial Stability Report (FSR), reflecting the overall assessment on the stability of India's financial system and its resilience to risks where it noted the sharp rise in the GNPA's to 7.6% from 5.1% between September 2015 and March 2016, largely reflecting the NPA recognition due to asset quality review (AQR). Moreover, the profitability of scheduled commercial banks (SCBs) declined significantly with the public sector banks (PSBs) recording losses during FY 2016. While the credit and deposit growth of SCBs slowed significantly during FY 2016, their overall capital to risk-weighted assets ratio (CRAR) level increased between September 2015 and March 2016. Going forward, a slew of measures taken by the Government to address the issues related to distressed industrial sectors is expected to improve the credit growth.

The RBI introduced 'Scheme for Sustainable Structuring of Stressed Assets' for resolution of large borrower accounts, differentiating the sustainable and unsustainable lending to the company, allowing banks to convert only the unsustainable debt to equity. This will accelerate the process of placing real assets back on track by reworking the financial structure of entities facing genuine difficulties, while providing the possibility of upside to the lenders when the borrower turns around.

The recent uptick in the monsoons, the announcement of the 7th Pay commission as well as the sustained reforms momentum of the government are positive for corporate earnings in the medium term while the low earnings base is favorable for the FY 2017 corporate earnings.

Given the improving macro economic backdrop, we believe that the equity market offers an attractive entry point for a long-term investor with a 3-5 year view.

Debt Market Outlook

Debt market in the month of June 2016 saw the benchmark 10 year Government security (G-sec) close the month at 7.45%, easing by 2 bps over the month. On the corporate bond side, the 10 year AAA corporate bond closed the month at around 8.21%, easing by 2 bps over the month.

In the month of June, the Foreign Portfolio Investors (FPIs) were sellers of Indian debt to the extent of USD 0.88 bn.

The government has notified the relevant amendments to the RBI Act thereby enabling the formation of a monetary policy committee (MPC) along expected lines. The six-member MPC will have three RBI personnel, including the Governor (chairperson) and the Deputy Governor for macro-inputs. The government will appoint the remaining three members following a search and selection panel. The RBI Governor will have a casting vote in case of a tie.

The minutes of RBI's technical committee prior to the second bi-monthly monetary policy revealed that three of the five members recommended no change in the policy rate while two members sought a 25 bps reduction in the repo rate.

The members noted that the global economic recovery was struggling to gain momentum as strong decelerating forces persisted in inhibiting growth in key emerging market economies (EMEs) even as growth in some key advanced economies (AEs) had moderated. Deflation fears remained on account of subdued global trade, weak growth prospects in EMEs and still low commodity prices.

On domestic economic growth, the members were concerned on account of the sustained weakness of industrial production and low capacity utilization numbers reflecting demand shortfall. However, they noted the improvement in corporate sector activity with double digit growth in EBIDTA.

Most of the members expressed concern on the inflation outlook since food inflation had risen by 100 bps, headline inflation inched up by 60 bps as well as core inflation has remained sticky in recent months. They also noted upside risks to inflation associated with a rebound in international crude oil prices and opined that further upside risks to inflation could arise from the implementation of the 7th pay commission, one-rank-one-pension recommendations and adverse supply shocks.

For the second bi-monthly monetary policy, three of the five members who recommended no change in the policy rate, wanted to see substantially lower inflation relative to the FY 2017 target of 5% on a durable basis; assess the effect of the monsoon in the next couple of months and get further clarity on the US Federal Reserve's stance on the Fed funds rate.

Two members recommended a policy repo rate reduction by 25 bps as they opined that the shortfall of demand in the economy called for some stimulus consistent with flexible inflation targeting as well as anchoring of inflation expectation and expected the effect of the predicted good monsoon to keep food prices under check. One of these two members was of the view that, given the fragmentation and incompleteness of India's financial markets, the repo rate had proved to be a much less effective instrument of monetary policy and hence, the RBI needs to ensure that there is ample liquidity and that reserve money expands by 12-14% if the effects of previous repo rate changes are to be transmitted to the markets.

We remain constructive on the fixed income market and believe that the delay in the interest rate hike from the US Federal Reserve due to concerns surrounding Brexit has eased pressures on the Indian fixed income space. A recent pick up in the south west monsoon augurs well for the fall in food inflation trajectory in the medium term. This would open up more space for the RBI to nudge the repo rate lower and trigger the next leg of easing in G-sec yields.

Disclaimer

1. The fund is managed by Tata AIA Life Insurance Company Ltd. (hereinafter the "Company").
2. Past performance is not indicative of future performance. Returns are calculated on an absolute basis for a period of less than (or equal to) a year, with reinvestment of dividends (if any).
3. All investments made by the Company are subject to market risks. The Company does not guarantee any assured returns. The investment income and price may go down as well as up depending on several factors influencing the market.
4. Every effort is made to ensure that all information contained in this publication is accurate at the date of publication, but no responsibility or liability in respect of any error or omission is accepted by the Company.
5. Income Tax benefits would be available as per the prevailing income tax laws, subject to fulfillment of conditions stipulated therein. Tata AIA Life Insurance Company Ltd. does not assume responsibility on tax implication mentioned anywhere in this document. Please consult your own tax consultant to know the tax benefits available to you.
6. Please know the associated risks and the applicable charges, from your Insurance agent or the Intermediary or policy document issued by the insurance company.
7. Various funds offered are the names of funds and do not, in any way, indicate the quality of the funds, their future prospects & returns.
8. Premium paid in ULIPs are subject to Investment risks associated with capital markets & the NAV of the units may go up or down based on the performance of the fund and factors influencing capital markets & the insured is responsible for his/her decision.
9. Whilst every care has been taken in the preparation of this document, it is subject to correction and markets may not perform in a similar fashion based on factors influencing the capital and debt markets; hence this review note does not individually confer any legal rights or duties.
10. For more details on risk factors, terms and conditions please read sales brochure carefully before concluding a sale.
11. Unit Linked Life Insurance products are different from traditional insurance products and are subject to risk factors.
12. Tata AIA Life Insurance Company Limited is only the name of the Insurance Company & any contract bearing the prefix "Tata AIA Life" is only the name of the Unit Linked Life Insurance contract and does not in any way indicate the quality of the contract, its future prospects or returns.
