Guaranteed NAV Funds

The fund would be predominantly invested in equity at inception, wherein the dynamic asset allocation mechanism allocates the portfolio between equity and debt. This dynamic asset allocation is based on the performance of equity markets and movements in interest rates. The equity allocation may be reallocated to debt if the equity markets or interest rates fall, to safeguard the guarantee.

Over time, the asset mix will predominantly shift to debt to protect the guarantee. This dynamic asset allocation process will drive the returns generated by the Apex Return Lock-in Fund. The dynamic asset allocation shifts the allocation of the fund from an equity bias to a debt bias, overtime. This would mean that the Guaranteed NAV would not mimic the highest level of the equity market, over the period the guarantee is applicable. Any unexpected and sharp falls in equity market and/or interest rates, during the period the guarantee is applicable, may trigger the allocation to completely move towards debt, to protect the highest NAV achieved prior to the fall. Overall, it is an ideal fund for an investor who wants to take advantage of high returns in a positive market scenario while safe-guarding the investment during any downturn.

APEX Return Lock-In Fund (ULIF 032 18/02/09 ARL 110)

| Fund Details | | Fund Performance | | | | Asset Allocation |
|---|--|------------------|-------------|------------|-------------------|---------------------|
| Investment Objective | : The investment objective for Apex Return Lock-in Fund is to use the participation in an actively managed well diversified equity portfolio of large cap companies to generate capital appreciation and use high credit quality debt instruments to lock-in that capital appreciation. The initial asset allocation in equities is targeted at 80% to 100%. | PERIOD | DATE | NAV | NAV Change | INDEX Change |
