Top 200 Fund (ULIF 027 12/01/09 ITT 110)

Fund Details

Investment Objective : The Top 200 fund will invest primarily in select stocks and equity linked instruments which are a part of BSE 200 Index with a focus on generating long term capital appreciation. The fund will not replicate the index but aim to attain performance better than the performance of the Index. As a defensive strategy arising out of market conditions, the scheme may also invest in debt and money market instruments.

Guaranteed NAV Funds

The fund would be predominantly invested in equity at inception, wherein the dynamic asset allocation mechanism allocates the portfolio between equity and debt. This dynamic asset allocation is based on the performance of equity markets and movements in interest rates. The equity allocation may be reallocated to debt if the equity markets or interest rates fall, to safeguard the guarantee.

Over time, the asset mix will predominantly shift to debt to protect the guarantee. This dynamic asset allocation process will drive the returns generated by the Apex Return Lock-in Fund. The dynamic asset allocation shifts the allocation of the fund from an equity bias to a debt bias, over time. This would mean that the Guaranteed NAV would not mimic the highest level of the equity market, over the period the guarantee is applicable. Any unexpected and sharp falls in equity market and/or interest rates, during the period the guarantee is applicable, may trigger the allocation to completely move towards debt, to protect the highest NAV achieved prior to the fall. Overall, it is an ideal fund for an investor who wants to take advantage of high returns in a positive market scenario while safe-guarding the investment during any downturn.

APEX Return Lock-In Fund (ULIF 032 18/02/09 ARL 110)

Fund Details		Fund Performance				Asset Allocation
Investment Objective	: The investment objective for Apex Return Lock-in Fund is to use the participation in an actively managed well diversified equity portfolio of large cap companies to generate capital appreciation and use high credit quality debt instruments to lock-in that capital appreciation. Asset Allocation

Equity Outlook

The month of June 2016 saw the benchmark index S&P BSE Sensex gain 1.24% while Nifty 50 gained 1.56%. The Mid-cap index, Nifty Free Float Mid-cap 100 surged 3.94% during the same period.

The FIIs were net buyers with inflows of around USD 0.72 bn in the month of June 2016 and the DIIs were net sellers to the tune of USD 0.32 bn with insurance companies' net sellers to the tune of around USD 0.36 bn even as domestic mutual funds were net buyers to the tune of USD 0.04 bn.

In the month of June, the Indian equity market took the key global event, 'Brexit' in its stride and scaled higher levels on the back of domestic triggers such as 7th pay commission, a pickup in monsoons after a slow start and a slew of reforms announced by the government. Going forward, the markets will react to the Q1 FY 2017 earnings season, legislative activity in the monsoon session of parliament around the possible passage of the key GST Bill, the announcement of the new RBI governor as well as further progress of the monsoons in the crucial sowing months of July and August.

In an effort to open up the Indian aviation sector, the government announced the National Civil Aviation Policy, where it eased the norms for domestic carriers to fly international routes. The policy outlined guidelines to make flying more affordable by capping airfares and increase regional connectivity by creating a 'viability funding mechanism' to support airlines on unviable routes.

The Union Cabinet has approved the Bill to allow malls, local markets, restaurants and movie theatres, not covered under the Factories Act 1948 with more than 10 employees, to remain open for 24 hrs and 7 days a week. Once the Bill is passed, the retail industry expects higher footfalls, open new avenues of growth, and a level-playing field with e-commerce players in addition to generating jobs and increasing consumer convenience.

The Union Cabinet approved a special package for the textile and apparels sectors with the aim of generating 10 mn jobs in these sectors over the next three years. The package includes various measures which are labour friendly, promote employment generation, economies of scale and boost exports. In a bid to attract private sector investment into exploration of non-fuel and non-coal minerals, the Union Cabinet approved the National Mineral Exploration Policy (NMEP) which allows acreages to be auctioned to private companies for mining on a revenue-sharing model.

The RBI released the Financial Stability Report (FSR), reflecting the overall assessment on the stability of India's financial system and its resilience to risks where it noted the sharp rise in the GNPA to 7.6 % from 5.1% between September 2015 and March 2016, largely reflecting the NPA recognition due to asset quality review (AQR). Moreover, the profitability of scheduled commercial banks (SCBs) declined significantly with the public sector banks (PSBs) recording losses during FY 2016. While the credit and deposit growth of SCBs slowed significantly during FY 2016, their overall capital to risk-weighted assets ratio (CRAR) level increased between September 2015 and March 2016. Going forward, a slew of measures taken by the Government to address the issues related to distressed industrial sectors is expected to improve the credit growth.

The RBI introduced 'Scheme for Sustainable Structuring of Stressed Assets' for resolution of large borrower accounts, differentiating the sustainable and unsustainable lending to the company, allowing banks to convert only the unsustainable debt to equity. This will accelerate the process of placing real assets back on track by reworking the financial structure of entities facing genuine difficulties, while providing the possibility of upside to the lenders when the borrower turns around.

The recent uptick in the monsoons, the announcement of the 7th Pay commission as well as the sustained reforms momentum of the government are positive for corporate earnings in the medium term while the low earnings base is favorable for the FY 2017 corporate earnings .

Given the improving macro economic backdrop, we believe that the equity market offers an attractive entry point for a long-term investor with a 3-5 year view.

Quick Glance - Funds Performance

(Funds with AUM of more than ₹125 crores as on 30th June 2016)

Debt Outlook

Debt market in the month of June 2016 saw the benchmark 10 year Government security (G-sec) close the month at 7.45%, easing by 2 bps over the month. On the corporate bond side, the 10 year AAA corporate bond closed the month at around 8.21%, easing by 2 bps over the month.

In the month of June, the Foreign Portfolio Investors (FPIs) were sellers of Indian debt to the extent of USD 0.88 bn.

The government has notified the relevant amendments to the RBI Act thereby enabling the formation of a monetary policy committee (MPC) along expected lines. The six-member MPC will have three RBI personnel, including the Governor (chairperson) and the Deputy Governor for macro-inputs. The government will appoint the remaining three members following a search and selection panel. The RBI Governor will have a casting vote in case of a tie.

The minutes of RBI's technical committee prior to the second bi-monthly monetary policy revealed that three of the five members recommended no change in the policy rate while two members sought a 25 bps reduction in the repo rate.

The members noted that the global economic recovery was struggling to gain momentum as strong decelerating forces persisted in inhibiting growth in key emerging market economies (EMEs) even as growth in some key advanced economies (AEs) had moderated. Deflation fears remained on account of subdued global trade, weak growth prospects in EMEs and still low commodity prices.

On domestic economic growth, the members were concerned on account of the sustained weakness of industrial production and low capacity utilization numbers reflecting demand shortfall. However, they noted the improvement in corporate sector activity with double digit growth in EBIDTA.

Most of the members expressed concern on the inflation outlook since food inflation had risen by 100 bps, headline inflation inched up by 60 bps as well as core inflation has remained sticky in recent months. They also noted upside risks to inflation associated with a rebound in international crude oil prices and opined that further upside risks to inflation could arise from the implementation of the 7th pay commission, one-rank-one-pension recommendations and adverse supply shocks.

For the second bi-monthly monetary policy, three of the five members who recommended no change in the policy rate, wanted to see substantially lower inflation relative to the FY 2017 target of 5% on a durable basis; assess the effect of the monsoon in the next couple of months and get further clarity on the US Federal Reserve's stance on the Fed funds rate.

Two members recommended a policy repo rate reduction by 25 bps as they opined that the shortfall of demand in the economy called for some stimulus consistent with flexible inflation targeting as well as anchoring of inflation expectation and expected the effect of the predicted good monsoon to keep food prices under check. One of these two members was of the view that, given the fragmentation and incompleteness of India's financial markets, the repo rate had proved to be a much less effective instrument of monetary policy and hence, the RBI needs to ensure that there is ample liquidity and that reserve money expands by 12-14% if the effects of previous repo rate changes are to be transmitted to the markets.

We remain constructive on the fixed income market and believe that the delay in the interest rate hike from the US Federal Reserve due to concerns surrounding Brexit has eased pressures on the Indian fixed income space. A recent pick up in the south west monsoon augurs well for the fall in food inflation trajectory in the medium term. This would open up more space for the RBI to nudge the repo rate lower and trigger the next leg of easing in G-sec yields.
